My dearest Lennie

I have had the

sweetest little letter

from Mr. Eric Stenham

as another as sweet

from Mr. Telford

Petrie. Do apologise

to them both for my

carelessness in sending

a volume of verse - but

not particular volumes

Scale How,

Young women condescend
again to join with their work,
a little so I am waiting
for 'Anthony his book' &
hopeless ask his dear
Mamma to send it home.

Loys have been
up to London & prepared at
the dear Sec - I hope there
is not had as trouble -
I wonder would the
vacation class be looked
at as a chance in view

Of Mr Bingley's Vacation home?
 We must keep in with
 the powers that be do you
 think? I am rather tired
 to just send you dear love
 & wait to talk abt Bingley
 later.

How delicious that Mr
 Newman was bent on leaving
 the Mount Street School!
 He was really right!
 I've so much love in it.

Your letters are a

joy to me - partly because

they tell lovely things, but

chiefly because they read
like yourself - and so we

feel that you are really

did not occur earlier -

on May 9th. Now, can't
you bring her dear? only you
must stay a week at least
it will not be allowed to return
with the lady.

And now, dear Friend, see
what I am sending you!
Isn't it glorious. another
captive entirely of your bow
& spear. You've really had
nothing to tell her. She knows
everything methodically
& exactly. & now I am
for the continuation of the thing.

It will be a cost-effective

We have come for a week to

But what a success!

"We found everything as we had been
old only more so. It is like a
fairy tale to those who did not
know. I did not require the
actual sight to believe" but she did!!
but I did find the whole thing
most refreshing & stimulating. It

Certainly compares well with Miss
Danner. Mrs Evans & is much
above Mrs. Hanson's way. "There
are two of our schools" Mrs. Hanson
met us for lunch. I must not let
you" - but why should I copy
all this I am enclosing you
all Mrs. has references to the school

Scale How.

Mr. ~~How~~ Hamilton waits till I come
here & tell all about it in detail -

But how I delight in the whole
story! I know I love the dear lady
who has made Digbylington!

I have some fears that
Bdford may drop. Amongst the dif-
ficulties they may get - some of
the books on their own account
I use them in their own way -
a thing that has been done ~~often~~
by many schools & families
with little or no result - they
might just as well pour as
they are. So, dear, put out

all your strength to carry the
points indicated in the letters
I am sending you. ⁱⁿ the copy of
my answer. Please do not
ask me to adapt - the Common
Curriculum, is my own. This
the only thing for a true education.

I am sending you copies
of the two letters you asked
about. You will see that Dr.
Lyttleton embraces the idea.

I find way to the very dear

And just hard I long to be

me to the dear teachers, in the
various schools, whom I know.

They are doing a great work.
And now I have a sweet little
secret to tell you - Mr. Lytton
comes to you in February to
see Dr. Whiston. Then to Rev. Mr.

to talk "It" over with them - then
on here to thresh out everything
sportily himself at all points.

 they will use us in their way,
 not in ours, & will not
 allow us a 'say'. Well, let it
 follow as we can work. This

Mr. Loggins Williams, one

but I am always open to conviction

2. You want Miss Drury
to come to W^{ash}. twice - in July
to you in August - to Bingley?
By the way what is the
Bingley date? I wanted to keep it.

3. Your idea is that Miss
Drury should give two addresses,

am to write? I think it

How much depends on
you! We are all watching with
breathless interest your success
with one of those old schools
which believe that they know
all things & know all things.

But - the Inspector complains
that ^{they} are inarticulate both
in speech & writing - and
no "being breathing thought
breath" is inarticulate - one way
or other. Wherefore do we Harry
them an education as

unconditioned as Christianity.
 (a religion in the complete
 sense Christian). adapted
 to all classes of society,
 to all ages
 taken promptly by all, &
 perhaps you will live to see
 it embraced by all races.

Such a big thing we had
 to take care of & we must
 not let it be "by relations and
 acquaintances." Therefore, the
 beloved Person must
 not press the point of beginning

with the little ones (outside
of her very own dominions)
because, you see, by doing
so we condense & narrow the
great principle that there
is in children of every age
the natural readiness to take
what is offered. That it is not
any cleverness or training
of ours that prepares them,
but that they take to knowledge
as to bread & butter if it is
offered in a certain way.
